02 · Controls → Industry Incidents

Which SHIELD-AI controls are actually **evidenced by real incidents**? This view counts every reference to a control across the framework's incident coverage verdicts (INC-01…INC-92). The most-cited controls are the highest-priority hardening targets — they are the controls the real world has repeatedly shown we need.

Controls incident map

Controls incident map

Coverage leaders (most evidenced)

Control	Title	Incident references
MS-08	MCP	61
EE-01	Execution environment boundary enforcement	51
TP-15	In-process code-execution sandbox sufficiency	49
MIR-02	Behavioural anomaly detection baseline per-agent behaviour established over training period; alerts on deviation – unusual tool, unusual data access pattern, unusual frequency;	43
EE-07	Agent control-plane configuration integrity	41
MS-09	Perception-fidelity enforcement for human-in-the-loop approvals	40
TP-06	Dependency scanning	39
TP-10		36

Control	Title	Incident references
	Agent platform inbound control-plane protection	
MS-04	Adversarial robustness	35
EE-08	Evaluation-harness isolation and integrity	29

Full coverage inventory

Control	Title	Incident references
MS-08	MCP	61
EE-01	Execution environment boundary enforcement	51
TP-15	In-process code-execution sandbox sufficiency	49
MIR-02	Behavioural anomaly detection baseline per-agent behaviour established over training period; alerts on deviation – unusual tool, unusual data access pattern, unusual frequency;	43
EE-07	Agent control-plane configuration integrity	41
MS-09	Perception-fidelity enforcement for human-in-the-loop approvals	40
TP-06	Dependency scanning	39
TP-10	Agent platform inbound control-plane protection	36
MS-04	Adversarial robustness	35
EE-08	Evaluation-harness isolation and integrity	29

Control	Title	Incident references
EE-05	Host-trusted configuration file injection prevention	27
TP-16	Tool-connection and launch-path integrity	26
MS-10	Agent memory-store integrity	25
TP-01	Tool inventory and registry	21
TP-12	Tool-call provenance and dispatch verification	21
MIR-01	Agent activity logging	19
MS-12	MCP discovery-metadata and shared-cache integrity	17
TP-03	API gateway security	16
TP-13	Agent dependency-install provenance verification	16
IAM-03	Human oversight controls	15
GRM-02	Requirement:** AI risk register	15
TP-04	Tool output validation	15
MS-11	Operational data-stream integrity	14
TP-09	Explicit tool registration — no implicit tool exposure	14
GRM-04	Requirement:** Third-party AI risk management	13
IAM-02	Scope-bound delegation	13
TP-14	Skill/plugin payload integrity and instruction-channel isolation	12
MS-13	Transcript and conversation authenticity	12

Control	Title	Incident references
IAM-01	Agent identity management	11
EE-04	Evaluation sandbox integrity	10
DS-06	Requirement:** Output validation	10
IAM-09	Multi-tenant agent platform isolation	10
TP-05	Pipeline integrity	9
MS-15	Cross-tenant agent memory and state isolation	9
DS-07	Requirement:** Agent-originated artifact publication control	8
TP-11	Agent browser and content-rendering isolation	7
MIR-06	Forensic readiness	7
MS-05	Model behaviour validation	6
EE-02	Infrastructure API access control	6
MS-07	Deployment context obfuscation	5
EE-03	Resource usage limiting	5
GRM-06	Requirement:** Board and executive reporting	5
MS-14	Self-replication barrier	5
IAM-10	Taint-tracked least-privilege subagent scoping	5
MIR-04	Incident response playbooks AI-specific IR procedures distinct from general IR: prompt injection containment, model rollback,	5

Control	Title	Incident references
	tool access revocation, session invalidation;	
TP-07	Cross-tool dependency analysis	4
IAM-06	Cross-session boundary enforcement	4
EE-06	Fail-closed sandbox operation	4
GRM-03	Ethical use policy	4
MS-03	Supply chain security	4
TP-08	API gateway infrastructure-isolation mode	4
DS-03	Memory sanitisation	4
DS-08	Requirement:** Destination and emergent-channel egress inventory	4
IAM-04	Credential isolation	4
IAM-08	Credential scope narrowing	3
DS-01	Data classification and labelling	3
IAM-07	Transitive delegation chain enforcement	3
DS-04	Data minimisation	2
MS-02	Training data integrity	1
GRM-01	AI governance body	1
DS-02	Inference data protection	1
MS-06	Model inventory and lineage tracking	1
MIR-03	Prompt audit log	1
GRM-05	Regulatory mapping and compliance reporting	1

Control	Title	Incident references
MS-01	Model weight protection	1
IAM-05	Just-in-time access	0
TP-02	Tool access control	0
DS-05	Training data governance	0
MIR-05	Mandatory reporting integration	0

Not yet directly evidenced by an incident (4 controls)

These controls are part of the framework’s baseline but have not yet been the direct subject of a catalogue incident. They are required coverage, not optional — the absence of a documented incident is a coverage gap to close, not a control to drop.

IAM-05, TP-02, DS-05, MIR-05
